

WHITELINE PLUS

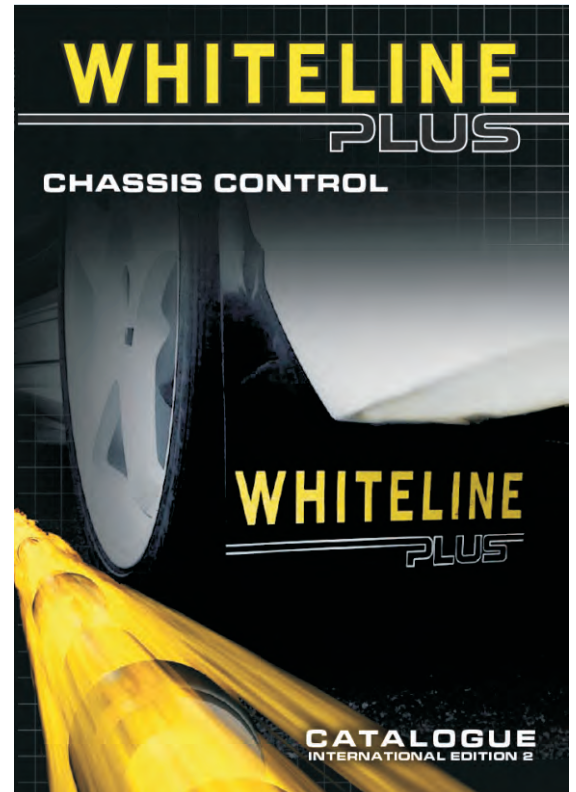

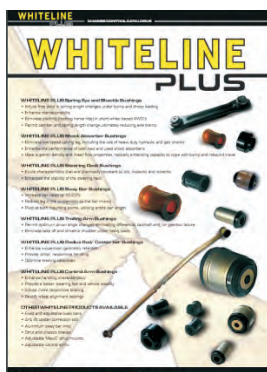

Whiteline Plus Edition 2 Catalogue now available

WHITELINE is pleased to announce the availability of its 2nd Edition WHITELINE PLUS Chassis Control catalogue. Launched in late 2008, WHITELINE PLUS is a range of progressive polyurethane suspension bushings and components. The progressive feature refers the polyurethane's ability to provide the quality ride of rubber at lower speeds and at higher speeds to become firmer, when under cornering pressure, for CHASSIS CONTROL and improved handling.

The 2nd edition is a much improved version of the first as it includes some new features such as:

- Vehicle suspension type image reference
- Most popular/ key/ important product image reference
- Kit contents breakdown
- Key service item flag

WHITELINE PLUS caters for a wide range of motor vehicles, from early to late, hatchback to commercial, restoration to performance. It provides the reliability, durability, added safety and ride quality characteristics for everyday vehicles and servicing. The road holding stability, handling and abrasive resistance for performance and 4x4 vehicles. The neutral (black) appearance for restorers and racers.
