Flat out

*Heavy duty
sway bar links*

Suit most Subaru
including WRX

The standard sway bar links on Subaru Impreza, Liberty, Legacy & WRX are very compliant. The rubber bushes easily distort, while the actual plastic link flexes under load. This may be quite acceptable for everyday use, however it does severely limit the effectiveness of the swaybars. Even worse if you use high performance options like our Selbys Blade adjustables. In fact, the original rear links distort enough to reduce the rear bar rate by up to 80kg of force. Supplied as a complete DIY kit with fitting instructions. Ideal low cost performance improvement.

\$78*

Front part #

KLC20A

Rear part #

KLC19
