NEW

WHITELINE

Flat out

Introducing the new standard in performance dampers.
"The best adjustable road dampers in the world"

The Whiteline Group Series range of shocks offers performance at all levels. But if you're looking for real road performance get excited about our all new Group 4 shocks.

These are height and rate adjustable with no need for yearly maintenance (unlike others) that's right, maintenance free.

Specifically designed for performance road use, the high pressure mono-tube design utilises a class leading 40mm piston. Our unique top mounted composite bump and rebound rate adjuster changes only what you need while height adjustment doesn't require multiple C spanners. No need to lie under the car with a torch to adjust the rate, just lift the bonnet and adjust as required. Non-inverted mono tube design also means no stiction and noise problems like other road/rally hybrids.

Careful attention to spring and damper base rates makes them ideal for serious road and race use right up to slicks and weekend race sprints. Designed as part of the Whiteline system to mix and match with our range of swaybars, alignment aids and chassis bracing.

**You can have it all...
if you're serious.**

An extensive range developed specifically for performance road use. Turn over for more details including current and future applications.

These are a sample of what is under development but more is on the way.
Contact Whiteline or our dealers for more information

Whiteline Group 4 shocks are designed and manufactured in Holland and Australia. They use state of the art components and ISO certified design and manufacturing processes. All Whiteline Group 4 shocks are fully serviceable, tunable and rebuildable with a network of worldwide service centres.

Group 4 shocks are supplied with 60mm ID road/race optimised spring rates however they can easily be changed to suit other conditions and requirements. Whiteline and its agents can perform custom revalving to suit your needs.

As we say....you can have it all... if you're serious.
