EVO X

ADJUSTABLE CAMBER ARMS

KTA135

Whiteline is pleased to announce its latest product offering for the highly regarded Mitsubishi Evolution 10 (EVO X). Whiteline's heavy duty turnbuckle adjustable rear control arms, allow on car camber tuning for the serious street to track enthusiast. Low compliance heim joint bearings have also been incorporated for that extra advantage.

KTA135 represents part of a Whiteline handling system. Designed to match and integrate with adjustable sway bars, key alignment products and low compliance bushings to deliver a fully balanced handling solution.

BMF55Z

BMR84Z

KCA395 is designed to raise the front roll-centre geometry of your EVO X, by using specially engineered ball-joints and tie rod ends while still maintaining original steering geometry.

Factory arm eye to eye length is 365mm. KTA135 offers an adjustment range from 335mm to 435mm. That's 100mm of available adjustment and 70mm over factory.

Also available for the EVO X
BMF55Z - 27mm front adj. sway bar
BMR84Z - 27mm rear adj. sway bar
W0593 - Front lower c/arm - front
KCA395 - ROCK - Roll center kit
