MAZDA SPEED3

A sway bars objective is to reduce sway, or body roll, and stabilise a vehicle under lateral (cornering) forces. Having adjustability permits the roll stiffness to be tuned for different situations without replacing the entire bar. The stiffer the bar, the more force required to move the left and right wheels relative to each other. This increases the amount of force required to make the body roll.

Cornering loads are spread more evenly across the tyres delivering more grip and frankly, that's what it's all about. You also get improved tyre wear as your tyres stay flatter and more upright. Comfort improves because your car sits flatter through bends meaning less movement inside the vehicle.

Whiteline Swaybars are part of the Whiteline handling system. Designed to match and integrate with Chassis Bracing and key alignment products to deliver a fully balanced handling solution.

Polyurethane bushings are also included with lateral locks finishing off the kit to prevent walking of the sway bar.

So without reducing comfort, a Whiteline Swaybar will make your suspension system and tyres perform better, making the car more responsive while delivering more grip.

Loc	Description	Part No.	#	Note
F	Brace-strut tower alloy adj	KSB633	1	
F	Swaybar 22mm-heavy duty	BMF51	1	
F	Swaybar 24mm-X heavy duty	BMF51X	1	
R	Camber adj kit-control arm upper bushes	KCA394	2	on-car adj +/-1.0 deg
R	Swaybar 22mm-h/duty Blade adjustable	BMR78Z	1	
R	Swaybar 22mm-heavy duty	BMR78	1	
R	Swaybar 24mm-X h/duty Blade adjustable	BMR78XZ	1	

For those new to Whiteline, the brand graces a number performance suspension components that work hard to deliver real results and performance outcomes for vehicles and motorists the world over. Whiteline's primary focus was initially delivering 'bang for your buck' handling gains from the simplicity of an anti sway bar. But over the years, the expertise, the knowledge, the reputation and the products have grown since progressed to include additional offerings such as the range of infamous anti lift/caster kits, roll centre adjuster kits, adjustable control arms, camber kits, strut and chassis bracing.

Whiteline products are developed up by qualified and willing group of dedicated enthusiasts who are trained in the company's products and philosophy's. The R & D department drives the company to constantly find new and innovative solutions to suspension and handling problems. Using a range of sophisticated testing and data logging tools, we rely on regular testing to maximise the product benefits and ensure that they work as a complete package tuned to give you the best handling outcome.

WHITELINE BLADE

Whiteline adjustable sway bars offer up to 4 points of adjustment allowing in some cases 10 distinct stiffness settings for precise handling bias adjustment
