Copyright Notice

Redranger Pty Ltd is the owner of Copyright in this publication, including layout, drawings, text and part number systems. This publication must not be reproduced in whole, or in part without authorisation from Redranger Pty Ltd A.B.N. 99 124 177 297.

Returns

Non-manufacturer responsible credit returns will be subject to handling and repackaging fee of 15% and will only be accepted within 14 days from purchase date. The goods must be in resaleable condition and returned at the Purchasers expense. The Purchaser must apply for and receive a credit return number from the Company and provide original invoice number before a credit will be considered. Goods made to order or purchased specifically on behalf of the Purchaser will not be credited.

Pricing

The prices set out or referred to herein are recommended prices only and there is no obligation to comply with the recommendation. All prices are ex warehouse unless otherwise agreed to in writing. While the Company endeavors to provide advance notice of any changes, some prices may change without notice.

NOTE: Prices were accurate at time of print but may change without notice.

Warranty

The company warrants all road rated (excludes "custom" or items marked "Race" or "for off-road use only") catalogued product under its various brands to the original purchaser against faulty materials and workmanship, when used for their designated purpose a period of 1 year from the purchase date of retail sale or 20,000kms from the date of fitment, whichever occurs first. Warranty is automatically voided for all products if they are used on a race circuit or in any form of racing in general.

Any "custom" products or products catalogued or marked as "RACE" or "Off-road use only" are not suitable for conventional road use and are not covered by this or any other warranty whether specified or implied.

Whiteline Automotive's obligation under this warranty is limited to the replacement of the defective unit. The cost of removal of the defective unit and the installation of the replacement unit are not included.

Swaybar Diameter Conversion Chart

Showing percentage (%) increase in torsion for bars of the same shape, design and material specifications

Choose original bar diameter from left column, then follow across to the right to determine % increase in stiffness required. Or, check % stiffness of a new bar size against the original.

Eg. Original bar has a diameter of 24mm
 You would like the new bar to be approximately 50% stiffer.
 Sighting across you have a choice of either 38% for 26mm
 or, 60% for 27mm.

From mm	TO – mm

Alignment products ▲

Whitelines extensive line of Alignment products range from camber and castor kits to strut brace and under car braces. The following is a guide to decoding the suffixes of alignment product part numbers

- Q** - Suffix indicate strut braces that are already supplied with Quick Release clamps.
- X** - Suffix indicate extra feature update option available.
- A** - Suffix indicate an updated specification or part number
- M** - Suffix indicate motorsport components that are suitable for RACE USE ONLY.

Take careful note of any footnotes applicable to each part number and/or application. A full register of footnotes appears on the last page of the guide.

Springs ●

Control or *Flatout*. There are 2 separate options of spring type and height available in the Whiteline Spring range. The Control range is designed for optimum handling with a great sporty look. Lowering heights range between 25-40 mm depending on application and factory options. The Flatout range delivers a more dramatic lowered look delivering up to 50 mm lower ride height.

The Whiteline part number is your guarantee of a quality product. Use these numbers when ordering to ensure you receive a genuine Whiteline product. Numbers with an "A" suffix (eg. **78900A**) indicate an updated specification or part number. Take careful note of any footnotes applicable to each part number and/or application. A full register of footnotes appears on the last page of the guide.

Swaybars ✕

The Whiteline swaybar part numbers are designed to provide information as to the configuration and application of the individual part numbers. The following is a guide to decoding the swaybar part numbers.

Typical part number example

B	S	R	20	X	Z
----------	----------	----------	-----------	----------	----------

- B** - Denotes "Swaybar" product group.
- S** - Denotes Vehicle Manufacturer in this case Subaru.
- R** - Denotes vehicle fitment location front or rear. In this case R for rear.
- 20** - Specific part number.
- X** - Extra heavy duty oversized option. Can be up to XXX for Race oversize options.
- Z** - Denotes "Blade" adjustable type.

This sequence forms the basic part number with some other letter codes that are often used to give additional information, particularly for special applications.

Type codes:

These type codes refer to the fitment configuration of the Whiteline swaybar relative to the catalogued application. Footnotes are listed for each swaybar. They are grouped into replacement types (code **R** & **RK**) and others (codes **K** & **C**). Code **RK** (Replacement with Kit) is unique as it denotes a replacement swaybar supplied with a kit to replace existing mounts and parts. It is important that you refer to this information when identifying applications. For example, a full kit bar type code **K** from the catalogue, will not fit a replacement type original bar and vice versa.

Take careful note of any footnotes applicable to each part number and/or application. A full register of footnotes appears on the last page of the guide.

Shock Absorbers ■

Listings are to compliment the Whiteline range of Springs. Note some vehicles can not be lowered with Whiteline springs unless suitable shocks are matched.

Take careful note of any footnotes applicable to each part number and/or application. A full register of footnotes appears on the last page of the guide.

Universal Components & Spare Parts

W0595	Service bush kit for KTA108, KTA109
W0596	Service bush kit for KTA107
W0905	Service bush kit for KPR002A, KPR002X

Universal strut brace hardware

Universal fittings and hardware as used in Whiteline strut braces.

KSB01	Alloy bar to bracket through bolt kit. M10 x 1.5 socket head. 2x sets of bolts & nuts.
KSB02	Alloy bar end bolt kit. M14 x 1.5 custom head. 2x sets of bolt & nut.
KSB790	Quick release strut brace clamps. 2x sets of fittings & nuts.

Universal camber bolts

Generally catalogued for specific vehicles but can be also used for other unlisted applications with corresponding strut to wheel hub clevis mount hole. Eg. KCA412 can be used in other mounts using 12mm hole.

KCA410	Camber bolt kit - 10mm
KCA412	Camber bolt kit - 12mm
KCA414	Camber bolt kit - 14mm
KCA415	Camber bolt kit - 15mm
KCA416	Camber bolt kit - 16mm
KCA417	Camber bolt kit - 17mm

Springs

Universal bump stops

Specially designed for lowered applications or can be used to replace OEM type. Can be stacked. Refer to drawings for sizes and dimensions.

W0920	Suit 19-22mm shock or strut shaft-suit lowered strut. 2x set bump stop & dust boot
--------------	--

W0921	Suit 10-14mm shock shaft-suit lowered shock. 2x set bump stop & dust boot
--------------	---

W0922	Suit 20mm shock or strut shaft-larger dia. OE style. 2x set bump stop & dust boot
--------------	---

W0923	Suit 14-18mm shock shaft-suit lowered shock. 2x set bump stop
--------------	---

Springs

Universal coil wrap

Used to insulate and silence most common OEM and aftermarket coil springs including coil-over.

K60950

Suit 10-13mm coils (1.5m - enough to suit 2 x coils) - Black

K60951

Suit 13-18mm coils (1.5m - enough to suit 2 x coils) - Yellow

Universal leaf spring U-bolt kits

Used to mount lowering blocks to solid axles. Kits include: 4x U-bolts, 8x nuts and 8x washers. Measurement is distance between legs x length of legs in mm.

KU10

U-bolt kit - 76 x 230 mm

KU11

U-bolt kit - 70 x 230 mm

KU12

U-bolt kit - 57 x 230 mm

KU13

U-bolt kit - 73 x 240 mm

KU416

U-bolt kit - 85 x 225 mm

Universal race coils - cold wound high stress wire

Powder coated in XRD purple, these springs are cold wound from high stress Silicon Chrome wire. This minimises sag and lighter material allows up to 20% more bump travel at closed height for shorter overall length. Cold winding ensures ultra tight gap and dimension tolerances of less than 2%. Sold as single springs.

CS (Size)

Main race spring. Available in 61 and 64 mm ID in various lengths and rates. Contact Whiteline for more details.

CST (Size)

Flat wire tender or helper springs. Available in 61 and 64 mm ID in various lengths and rates. Contact Whiteline for more details.

ID Description

R	Replacement type
RK	Replacement kit type
C	Clamp on to original type
K	Full kit type
X	RACE ONLY
Q	Quick release kit available
T	Replacement threaded end adjust. - RACE use only
16	16mm
17	17mm
18	18mm
19	19mm
20	20mm
21	21mm
22	22mm
23	23mm
24	24mm
25	25mm
26	26mm
27	27mm
28	28mm
29	29mm
30	30mm
31	31mm
32	32mm
36	Quick Release clamp kit available for this brace. KSB790 allows for rapid removal of alloy centre brace.
37	Race or circuit use only. Not designed for street use.
38	KRR single rod kits fix left hand setback problem.
39	KRR 2 rod deluxe kits supplied with heavy duty poly front bushes.
40	KTA101 corrects rear axle steer. Suppled as 2 complete arms with poly bushes & instructions.
41	KCA366 replaces lower control arm rear mount. KCA371 replaces upper control arm inner bushes with eccentric poly bushed adjusters. Use both kits for max performance and race use.
42	Check existing bar size first. Available in 18/20/22mm. Order KBR28-Size or KBR29-Size.
43	Suit OEM or KBR29 series heavy duty swaybar mounts. Essential for large swaybars.
44	Suit KBR28 series heavy duty swaybar mounts(not OEM). Essential for large swaybars.
45	Check existitng bar size first. Available in 18/20/22mm. Order KBR27-Size.
46	Use KCA372 for vehicles with 22mm pin type rear of lower control arm mount. Use KCA358 for 18mm threaded pin and nut type mount.
47	Supplied with new poly bushes. COMFORT option uses softer 70D - RACE uses black 95D bush .
48	Check existitng bar size first. Available in 19/20/22/24mm. Order KBR20-Size.
49	Does NOT suit standard shocks. Shortened travel only with max droop measurement of 435mm measure front centre wheel to guard. Whiteline shocks modified to suit.
50	Modification maybe required for non-standard engine configuration.
51	Check existitng bar size first. Available in various sizes.
52	KCA377 removes and locks OE toe adjustment. To be used in conjunction with Whiteline KTA107-109 series or other style adjustable control arms. Essential for race or off-road use.
53	KLC31 is special priced vehicle kit containing KLC30 front and KLC26 rear alloy link as boxed set.
54	Measure OE passanger side bush retaining bracket. 25mm wide use KSR200. 30mm wide use KSR202.
55	Whiteline suggest fit with shock tower spacer. Spacer part no.'s; Control = KSA900(12mm) Flatout = KSA901(20mm).
56	Vehicles with self-levelling must replace self level unit with Whiteline gas shock # 110170 and new Whiteline bump stop # W0910. Disconnect fuse and self level wiring.
57	Short travel Whiteline premium h/duty gas shock available. Part # 110050
58	Fitted height may vary +/-15mm depending on condition and material used in strut top bearing assembly. Urethane 10-20mm higher, perished rubber 10mm lower.
59	Warning! 2" lowering block may allow tailshaft to contact floor.
60	Requires short open length shock, eg. FE2 spec.
61	Leaf spring rear
62	Premium height and rate adjustable coil-over kit available. See www.whiteline.com.au for more details.
63	Vehicles with factory sports suspension option may have up to 25mm lower std ride height. Control option 10-15mm lower but heavier rate. Flatout option 15-25mm lower but heavier rate.
64	Only suitable for vehicles fitted with 17"dia. wheels or bigger.
65	Check ID of original lower coil mount first. If reduced use 71713

ID Description

- 66 Whiteline suggest fitment of rear camber/toe adjusting kit. Up to and incl VX1 part # KCA330, VX2-on part # KCA384. Final ride height may vary +/- 15mm depending on final alignment settings used.
- 67 Whiteline suggest fitment of rear camber kit, part # KCA347
- 68 Some North American spec vehicles use different rear spring. Use rear part # 70384 if rear is excessively low.
- 69 Check top and bottom ID of original spring. If top = 125mm & bottom = 141mm use 70369. If top = 95mm & bottom = 138mm use 70368
- 70 Check ID of top of original coil. If top and bottom ID = 146mm use 70198
- 71 Cars with self-levelling rear must use complete Whiteline Sports Pack. Refer www.whiteline.com.au for full part number listing. Control & Flatout available.
- 72 HG,HK,HT may require KF21/KF22 spacer kit.
- 73 BAF7XX in 27mm can replace BAF7 and BAF7X for heavy duty applications. Price code C.
- 74 Front bar fitting kit available seperately to replace OE style brackets. Order part number KBR19. Refer parts section.
- 75 For rear applications fitted with optional Detroit 9" LS diff order part number KU4 oversize "U" bolt kit.
- 76 Some wagons may have saddle mounts on axle. If so order part no. KS6B saddle mount kit (Bolts Nuts included).
- 77 For VB-VL without rear bar, diff or chassis fittings use BHR29 K/18/B.
- 78 We suggest VN-VP front bars use link kit part no. KLC16 or KLC17 to convert existing link mount from strut to lower arm. KLC16 for aftermarket h/duty bars, KLC17 for OEM.
- 79 We suggest VR-VS front bars use link kit part no. KLC18 or KLC18X to convert existing link mount from strut to lower arm. KLC18X for aftermarket h/duty bars, KLC18 for OEM.
- 80 For VB-VL without rear bar, diff or chassis fittings use BHR29 K/18/B.
- 81 Special Order Only - (* Refer price list)
- 82 Rear high-lift sway bar link kit available, part # KLC22. Suit 50mm plus height lift.
- 83 Optimum swaybar sizes vary greatly with drivetrain type and other suspension mods used. RACE products are not designed for road use and may require other modifications to the vehicle or chassis.
- 85 Rear extra heavy duty swaybar mounts and brace KBR29-(bar size). 18/20/22mm available eg KBR29-18 for 18mm bar. Essential for big swaybars.
- 86 Lower control arm & swaybar mount brace KSB709 available to suit OEM or KBR29 series heavy duty swaybar mounts. Essential for oversize swaybars or race use.
- 87 Rear extra heavy duty swaybar mounts and brace available KBR28-(bar size). 18/20/22mm available eg KBR28-18 for 18mm bar. Also suggest KSB710 lower tie brace to suit KBR28 series mount. Essential for big swaybars.
- 88 Rear extra heavy duty swaybar mounts available KBR27-(bar size). 18/20/22mm available eg KBR27-22 for 22mm bar.
- 89 Supplied with extra heavy duty swaybar mounts KBR29-(bar size). Suggest KSB709 alloy lower tie brace, essential for big swaybars.
- 90 Supplied with extra heavy duty swaybar mounts KBR28-(bar size). Suggest KSB710 alloy lower tie brace, essential for big swaybars.
- 92 Front designed to clear most large bore exhausts.
- 94 Adjustable fabricated design requiring some welding - not for street use, race and circuit only
- 95 Adjustable bars suitable for street and race use. Front bars only suits beam type front end. Rear bars suit vehicles with IRS rear end ie Superbug & 68-70 stick shift auto.
- 97 Check size first-varies or stock on some models
- 98 replaces lower bolt < -3.0 deg RACE only
- 99 Can be used as full kit replacement for cars with OE bar
- 100 BAF13 series swaybars redesigned below driveshaft for extra clearance on lowered vehicles
- 101 Vehicles with rear swaybar mounted ride height sensor (eg E34 M5 with adaptive suspension) may experience difficulty refitting OE U-bolt to larger swaybar
- 103 *While stocks last
- 104 BCR1 designed to fit early 62-67 narrow chassis models. Modification may be required to fit later 68-81 wide chassis models.
- 105 Can fit 2x kits if required to double adjustment range.
- 106 BSR49X & BSR49XZ supplied standard with KBR15 swaybar mount support brace. Optional for BSR49
- 107 with factory DSC or ESP
