Flat out

Code: Z269

IMPORTANT: Whiteline Group 4 shock/strut kits are designed for race or off-road use but may be used on-road depending on specific vehicle registration regulations in your area. Extreme care must be taken when adjusting ride height to ensure correct operation of the suspension and any adjustments are at the owners own risk. It is recommended that installation and adjustment be carried out by qualified suspension and chassis specialists.

NOTE: Ride Height denotes adjustment range available only. It is NOT a height setting recommendation.

Part No.	Spec (1) C/D/R/Q	Application Make Model		Year	Note Chassis	Ride height +/- (2)				Spring Rate				Upper mount (3)	
						Front		Rear		Front		Rear		Front	Rear
						mm	inch	mm	inch	kg/mm	lbs/in	kg/mm	lbs/in		
1K4007C	C	Nissan	200SX	94-03	S14 S15	-50	-2.0	-45	-1.8	5.0	280	4.0	224	OEM	OEM
1K4007D	D	Nissan	200SX	94-03	S14 S15										
1K4007R	R	Nissan	200SX	94-03	S14 S15										
1K4007Q	Q	Nissan	200SX	94-03	S14 S15										

- Footnote:**
- 1- C - Circuit race / D - Drift / R - Race / Q - Quatermile or Drag race
 - 2- Range of ride height change. + = Raise / - = Lowering. Eg. -60 equates to 60 mm lowering
 - 3- If OEM use stock or existing strut top.

View of front clevis mount assembly showing brake bracket mount

View of rear shock unit fitted to vehicle. Note large alloy top spring spacer.

Warning: Please drive carefully while you accustom yourself to the changed vehicle behaviour.
