Whiteline/Audiobahn Project EVO VIII-S

Project EVO VIII-S (SEMA version) was prepared as a technological showcase of the current state of the art performance modifications available for the EVO VIII.

Doug Parks of Audiobahn Inc., owner of Project EVO VIII wanted the very best of what was available to develop a car with flawless cutting edge performance. More about "Go" than "Show", it still looks, feels and sounds great thanks to a killer paint job and state of the art electronics.

Doug chose Whiteline for the suspension and chassis tuning side. Their success with the racing Project EVO VIII and a reputation for developing the worlds best tuned performance solutions convinced him that they could deliver the result he wanted - a car that looked great and drove well mid week yet was right at the top of the field at the track on the weekend.

(1)-Height measurement in mm from centre of wheel to guard (CWTG), +/- 1.5%. Superlow applications with extra rear load can use standard low. Heights only available when using Whiteline specified shock absorbers and may vary with model and options.

(2)-North American indicative retail pricing in US \$'s. Fitting hours are an estimated guide including wheel alignment. May only be available when purchasing and fitting kit with same dealer. All prices quoted valid till 30/6/2005 but subject to change without notice.

(3)- 1K4029 Group'4 is height and rate adjustable coil-over kit using high performance 40mm piston inverted mono tube McPherson front strut for extra strength and 46mm piston non-inverted mono-tube Chapman rear strut for low maintenance shaft and external top rate adjustment. 1K4029 includes front and rear solid bearing strut top mount plate, front with camber adjustment.

(4)- Whiteline XRD race products and extra heavy duty options must be used with extreme care. Certain performance modifications like differential changes can dramatically affect vehicle behaviour making certain parts unsuitable. Other parts should not be used unless additional chassis strengthening has been provided and the user accepts that Whiteline can not be responsible for resultant damage to the vehicle, particularly in race use. Should only be used after consultation with a reputable suspension tuner. Contact Whiteline for more details. (www.whiteline.com.au)
