In the last few months Whiteline have been working hard on the release of our newly formatted and face lifted product application catalogue and we want you to be one of the first to see it.

**The main difference is that all parts are listed together for the one vehicle, no more flicking through three different sections of our catalogue for just one car.**

The page on the left shows the current layout with an explanation of how to use and interpret the new format.

We expect to be finished within weeks and will immediately list it on our website in PDF file format so you can view instantly, download to your own computer or print as many copies as required.

Printed versions will also be made available and we'd like your feedback now as to how many copies ideally you'd like to receive. We can not guarantee a full quota but we'd like to know the ideal quantity regardless.

Please fax back this sheet with details below or email your request to **admin@whiteline.com.au**

Name: \_\_\_\_\_

Ideal quantity: \_\_\_\_\_

## It's almost here....

The long anticipated "new look" catalogue still has to be finalised and then printed but we know you are going to find it even easier to purchase Whiteline products with the new layout and easy to read format.
