In the last few months Whiteline have been working hard on the release of our newly formatted and face lifted product application catalogue and we want you to be one of the first to see it.

The main difference is that all parts are listed together for the one vehicle, no more flicking through different sections of our catalogue for just one car.

The sample page on the left shows the general layout with an explanation of how to use and interpret the new format.

As usual, newer versions are also immediately made available on the on our website in PDF file format so you can view instantly, download to your own computer or print as many copies as required.

Additional printed copies are available on request and we'd like your feedback as to how many extra copies you might like to receive. We can not guarantee a full quota but we'd like to know the ideal quantity regardless.

Please fax back this sheet with details below or email your request to **admin@whiteline.com.au**

Branch: _____

Ideal quantity: _____
