(1)-Height measurement in mm from centre of wheel to guard (CWTG), +/- 1.5%. Superlow applications with extra rear load can use standard low. Heights only available when using Whiteline specified shock absorbers and may vary with model and options.

(2)-Special kit price in A\$ including GST. Fitting hours are an estimated guide including wheel alignment. May only be available when purchasing and fitting kit with same dealer. All prices quoted valid till 30/6/2005 but subject to change without notice.

(3)- Whiteline XRD race products and extra heavy duty options must be used with extreme care. Certain performance modifications like differential changes can dramatically affect vehicle behaviour making certain parts unsuitable. Other parts should not be used unless additional chassis strengthening has been provided and the user accepts that Whiteline can not be responsible for resultant damage to the vehicle, particularly in race use. Should only be used after consultation with a reputable suspension tuner. Contact Whiteline for more details. (www.whiteline.com.au)

(4)-Most Type R's fitted with front and rear upper chassis braces as standard.

(5)-Adjustable low pressure gas shocks are sport rated with modular spring seat and multi-height grooved shock bodies allowing even lower (extra) ride height of 25 mm front and 15 mm rear using same springs. Use #1102502 for cast lower arm rear with U shaped mount and #1102602 for Type R and vehicles with pressed arm and eye type lower shock mount.
