Handling Pack	Sports Pack	The Works
left-hand-drive		left-hand-drive
KLAN03H	1K4029C	KLAN03X
4.5 hours	5 hours	9 hours

(1)-Height measurement in mm from centre of wheel to guard (CWTG), +/- 1.5%. Superlow applications with extra rear load can use standard low. Heights only available when using Whiteline specified shock absorbers and may vary with model and options.

(2)-Special kit pricing may be available. Fitting hours are an estimated guide including wheel alignment. Contact Whiteline or your dealer for current pricing.

(3)- 1K4029 Group'4 is height and rate adjustable coil-over kit using high performance 40mm piston inverted mono tube McPherson front strut for extra strength and 46mm piston non-inverted mono-tube Chapman rear strut for low maintenance shaft and external top rate adjustment. 1K4029 includes front and rear solid bearing strut top mount plate, front with camber adjustment. Available in Circuit (1K4029C) or Race (1K4029R) spec.

(4)- Whiteline XRD race products and extra heavy duty options must be used with extreme care. Certain performance modifications like differential changes can dramatically affect vehicle behaviour making certain parts unsuitable. Other parts should not be used unless additional chassis strengthening has been provided and the user accepts that Whiteline can not be responsible for resultant damage to the vehicle, particularly in race use. Should only be used after consultation with a reputable suspension tuner. Contact Whiteline for more details. (www.whiteline.com.au)

Project EVO-VIII See www.whiteline.com.au for more details
