Suggested wheel alignment specs				Camber	Caster(6)	Toe
Optimum starting setting designed for use with Whiteline kit.				Deg	Deg	mm/side
<b>Front</b>	Touring			-2.0	L2.5 / R2.0	0.0
	Sport			-2.5	L2.5 / R2.0	0.0
<b>Rear</b>	Touring			-1.0 (7)	n/a	0.5mm in
	Sport			-1.0 (7)	n/a	0.5mm in

(1)-Height indicates measurement in mm from centre of wheel to guard, +/- 1.5%. Superlow applications with extra rear load can use standard low rear. These heights only available when using Whiteline specified shock absorbers.

(2)-Retail in A\$ includes GST, excl. freight. Special net price for package part number.

(3)-Handling and Works fitting prices include wheel alignment. Fitting and labour prices are meant as suggestions and are only available when purchasing parts kit from same dealer.

(4)-Options: These items not included in package but available as separate item.

(5)-Shocks are a monotube gas unit with integral spring platforms and sport valving. Whiteline Premium adjustable coil-overs feature externally adjustable ride height and shock rate using 40mm mono-tube high pressure gas shock and progressive springs. Suitable for road and race.

(6)-KCA332 provides extra +/- 0.75 static castor.

(7)-Rear camber factory adjustment is particularly inadequate for lowered cars. KCA347 replaces upper inner control and radius arm bushes using offset tube to deliver +/-0.75 deg change. Use 2 x KCA347 kits for both inner and outer for +/- 1.5 deg change. Supplied with 8 bush halves and 4 tubes per kit. Rear settings only available using this kit.

(8)-Whiteline Premium coil-over kit featuring adjustable ride height over 60mm, road/race progressive rate springs, large 40mm diameter mono tube high pressure gas adjustable shock.
