Suggested wheel alignment specs			
Optimum starting setting designed for use with Whiteline kit.			
		Camber(6)	Caster
		Deg	Deg
Front	Touring	-1.5	L9.0 / R8.5
	Sport	-2.0	L9.0 / R8.5
Rear	Touring	-1.5	n/a
	Sport	-2.0	n/a

(1)-Height indicates measurement in mm from centre of wheel to guard, +/- 1.5%. Superlow applications with extra rear load can use standard low rear. These heights only available when using Whiteline specified shock absorbers.

(2)-Retail in A\$ includes GST, excl. freight. Special net price for package part number.

(3)-Sports and Works fitting prices include wheel alignment. Fitting and labour prices are meant as suggestions and are only available when purchasing parts kit from same dealer.
Handling Pack: Front swaybar replacement requires lowering of front cross member and removal of control arms and radius rods. Rear swaybar fitment best done after lowering front of rear cross member. Strut brace fitment requires some drilling.
Sports Pack: Shocks are straight forward replacement units but camber toe kit best fitted after lowering front of rear cross member.

(4)-Options: These items not included in package but available as separate item.

(5)-Front shocks are a twin tube gas sport rated replacement strut leg with special shortened body. Rear shocks are mono-tube gas sport rated type with shorter travel.

(6)-KCA330 kit replaces rear trailing arm bushes with eccentric adjusters. Includes 8 bushes and 4 tubes and all necessary fitting hardware. Suggested wheel alignment settings only available with KCA330 kit.
